

PnP Systems company presentation

COMPANY PROFILE

COMPANY PROFILE

PnP Systems is a technology START-UP created to develop innovative hi-tech products and solutions for satellite & space industry.

Satellite & Space Industry

(Solutions for GNSS, GMES and telecommunications applications)

GNSS – Global Navigation Satellite Systems

GMES – Global Monitoring for Environment and Security

COMPANY LOCATION

AEROPOLIS Podkarpackie Science and Technology Park

- Specialization of the region: aviation and space
- Polish Space Agency branch office
- Aviation Valley Association
- Strong support from Rzeszow Regional Development Agency
- Scientific potential of Rzeszów University of Technology
- Dedicated EU funds for innovative R&D projects
- Good connection – airport and A4 highway

SPECIALIZATION AND COMPETENCES

Our specialization includes:

- GNSS and navigation systems
- radio-communication systems
- analogue and digital electronics
- GIS, GMES, satellite images
- telecommunication systems
- multisensory systems
- data processing

PRODUCTS & SOLUTIONS

Development of dedicated applications

- System for monitoring and detection of interferences in radio frequency bands dedicated for the navigation systems used in aviation
- Software Defined GNSS Receiver
- Aircrafts Identification System
- Air Traffic Controller Vision Support System

Technology consulting

- Consulting in the field of telemetry and spectrometry
- Consulting in the field of mechanics and optics for space instruments

References

Astri Polska

- GNSS Computation Server

Łódź University of Technology

- Consulting services in the field of computer design and modeling

Clear Sky Systems

- Maintenance of Automatic Weather Observation System (AWOS)
- Deployment and maintenance of IT reporting and validation system in the Polish Air Navigation Services Agency (PANSa)

SUMMARY

Why it is worth to cooperate with us:

- Focus on the realization of innovative and technologically advanced projects
- The international area of operation
- Unique and niche directions of company growth which are in line with the strategic direction of the European Commission (GNSS and ICT)
- Flexibility
- Experienced team in the realization of hi-tech project
